

Milano Lusso Flush/Top-Mount Sink

Kitchen sink

SKU: LA-80-MILANO-LUSSO-FL-SINKS

DETAILS

Material	AISI 304 stainless steel
Texture	Brushed in-line
Finish	Foster brushed
Edge / installation type	Flush-mount Top-mount
Base size	80 cm
Dimensions	806 x 520 mm
Width	81 cm
Bowls	1 bowl
Bowl dimensions	750 x 374 mm

Built-in hole	See technical data sheet
Mixer holes	2 standard holes, with a third hole available on request
Standard fittings	Fixing hooks, gasket, drain, overflow, siphon and boxed packing
Waste fitting	Automatic Space Push waste fitting
Drainer	No

EQUIPMENT

Black sink grids	Two black grids are supplied for use across the workstation levels.
Space Push waste fitting	Automatic waste fitting supplied with a neat push-control finish.

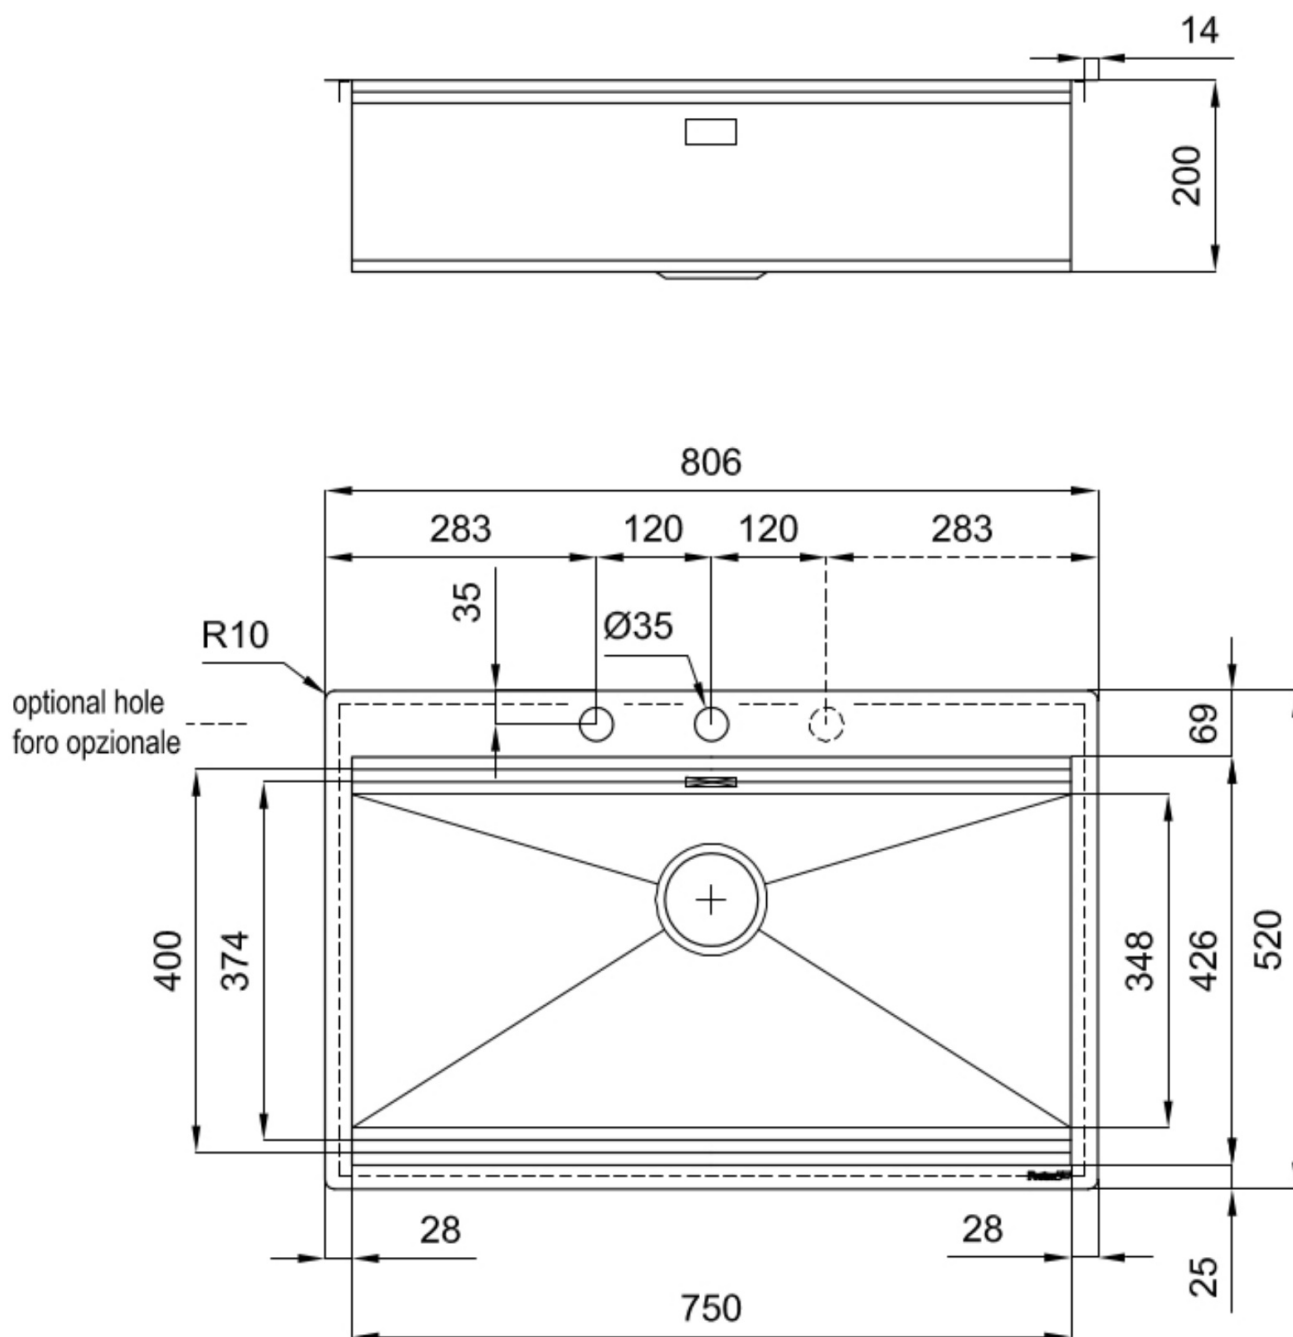

FEATURES

Additional holes available	Additional holes can be made to order for a two-hole mixer, remote waste control or soap dispenser. The available positions are shown on the technical drawings.
Automatic waste fitting	The supplied round remote knob opens and closes the drain without needing to reach into the bowl.
Diamond-shape bottom	The shaped base helps guide water towards the waste, improving drainage while keeping the bowl clean and practical for everyday use.
Double mixer hole	The rear tap ledge is supplied with two standard holes, allowing the mixer and waste control or an optional soap dispenser to be fitted neatly.

High thickness	Made from 1 mm stainless steel for strength, durability and a solid premium feel.
Perimetral overflow	The square perimeter overflow provides added protection against overfilling while keeping the bowl design clean and minimal.
Save-space system	The drain and siphon are designed to preserve useful space in the cabinet below the sink.
Space waste fitting	The Space steel cap covers the drain neatly and reduces visible residue, helping the bowl stay tidy in daily use.
Triple recess sliding accessories	Three integrated support levels let compatible grids, chopping boards, trays and bowls slide across the workstation. This creates flexible areas for rinsing, draining, cutting and food preparation inside the sink.

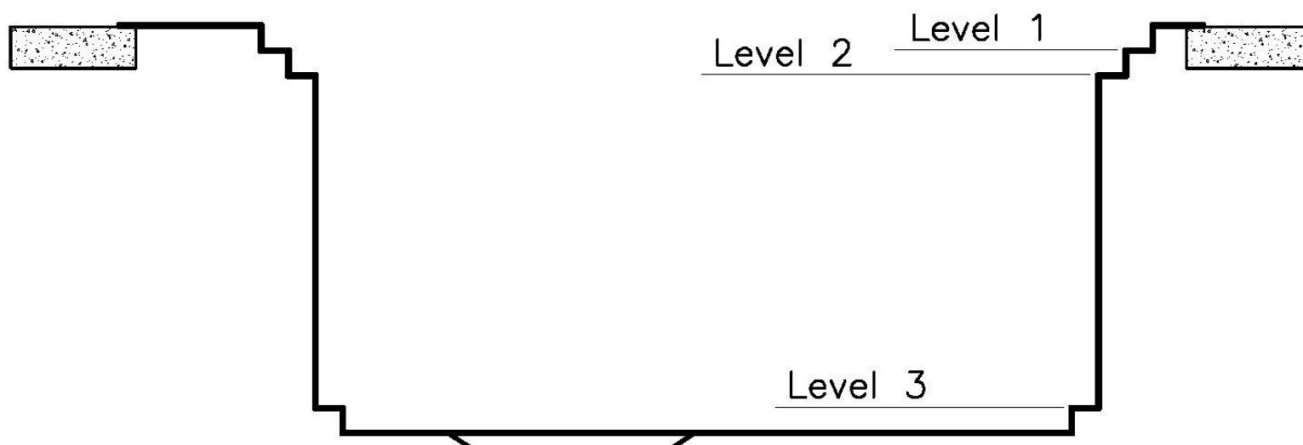

TECHNICAL DATA

The following pages show the key product dimensions, installation cut-outs and accessory support levels for flush-mount and top-mount installation.

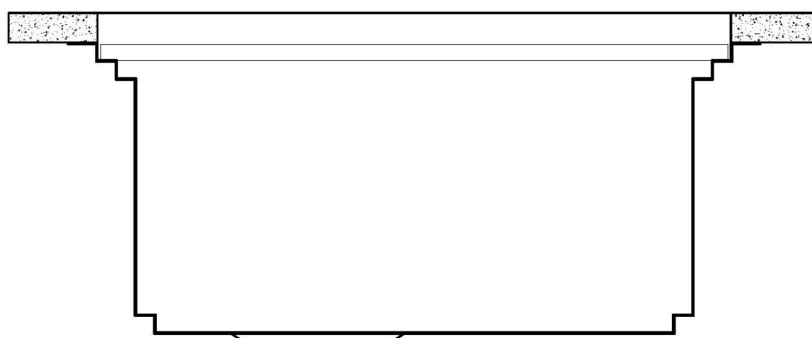

ACCESSORY RAIL SYSTEM

The Milano workstation rail system allows compatible grids, chopping boards, bowls and preparation accessories to sit securely at different levels within the sink. Accessories can be moved, combined and stacked to create a practical working area for rinsing, draining and food preparation.

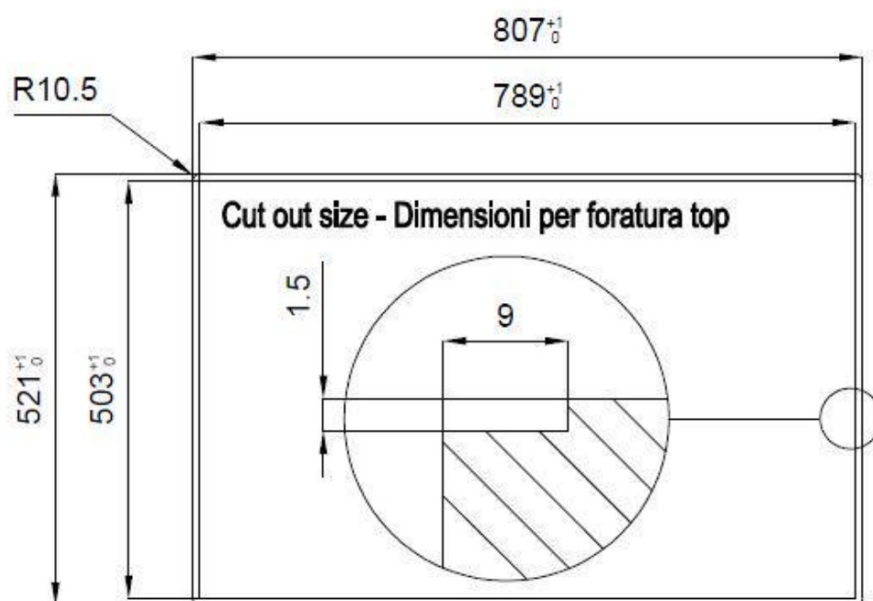

LEVEL 1

Level 1 supports accessories across the upper ledge of the sink for quick preparation and draining tasks.

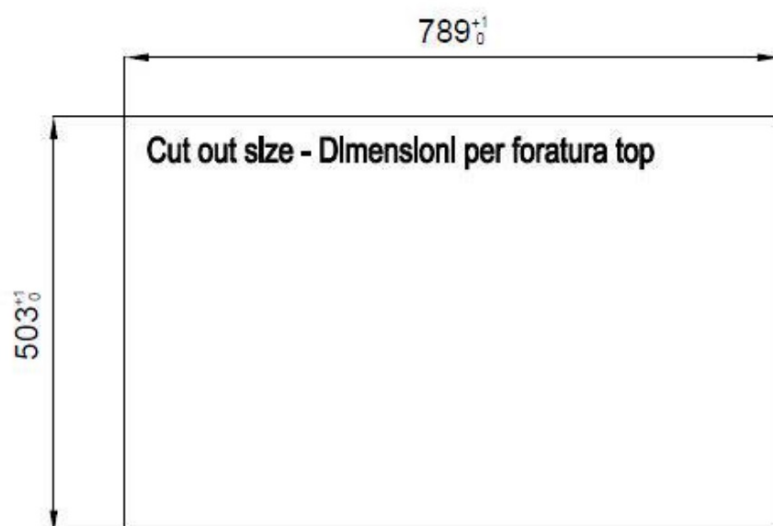

CUT-OUT SIZE

Cut-out dimensions for flush-mount and top-mount installation. Always check the worktop and installation method before cutting.
