---------------	----------------------------

Black sink grids Two black grids are supplied for use across the workstation levels.

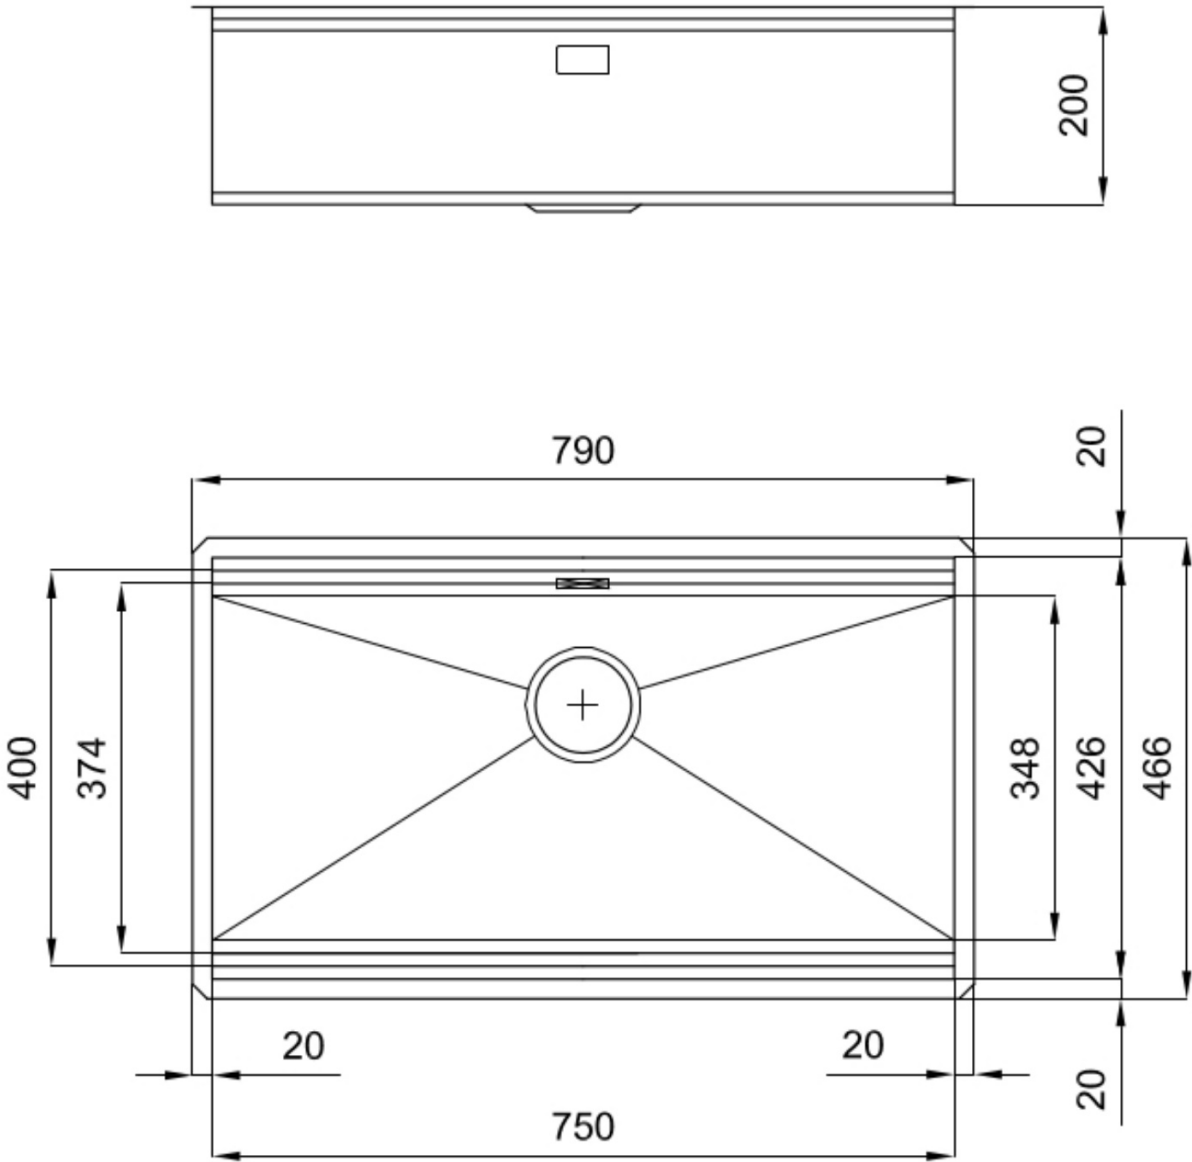

High thickness Made from 1 mm stainless steel for strength, durability and a solid premium feel.

Perimetral overflow	The square perimeter overflow provides added protection against overfilling while keeping the bowl design clean and minimal.
Save-space system	The drain and siphon are designed to preserve useful space in the cabinet below the sink.
Triple recess sliding accessories	Three integrated support levels let compatible grids, chopping boards, trays and bowls slide across the workstation. This creates flexible areas for rinsing, draining, cutting and food preparation inside the sink.

TECHNICAL DATA

The following pages show the key product dimensions, installation cut-out and accessory support levels for under-mount installation.

TECHNICAL DATA

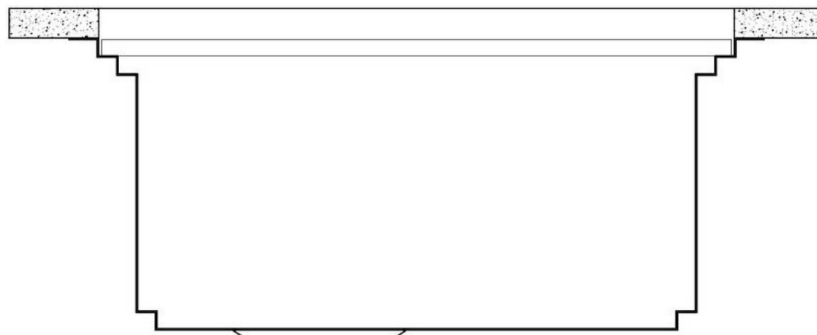

ACCESSORY RAIL SYSTEM

The Milano workstation rail system allows compatible grids, chopping boards, bowls and preparation accessories to sit securely at different levels within the sink. Accessories can be moved, combined and stacked to create a practical working area for rinsing, draining and food preparation.

LEVEL 1

Level 1 supports accessories across the upper ledge of the sink for quick preparation and draining tasks.

CUT-OUT SIZE

Cut-out dimensions for under-mount installation. Always check the worktop, bowl position and installation method before cutting.
