WARRANTY*

Our Range

Welcome to Luxair the UK's most comprehensive range of cooker hoods. For this, and many other reasons, we have been established as one of the leading and most progressive extractor manufacturers in Europe and the UK.

Founded in 2002, Luxair embraces the in-house disciplines of design, development and distribution of cooker hoods. We supply customers throughout the UK and Europe from our distribution headquarters in Ripon.

Luxair are market leaders and have an enviable reputation for their product quality and attention to detail, commercial integrity and outstanding customer service. Our product quality is achieved by working closely with UK appliance distribution networks to assure all materials are of the highest specification. Being 'customer solution' driven, Luxair are motivated by the needs of clients and excellent customer service. Our team of fully qualified, in-house service engineers work to assure most issues are dealt with in 24 hours.**

All Luxair extractor hoods are backed by a Two, Five or Seven Year 'Parts and Labour Warranty'.*

Don't forget to check out our full range of products and videos online at www.luxairhoods.com

We now have videos with in-depth descriptions of features and instructions of how to install the hoods.

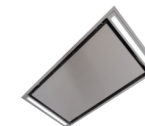

**service calls are normally responded to within 24 hours, subject to terms and conditions and customer availability. However where an engineer is unavailable, or the area is out of normal service reach, a turnaround of 14 days is quoted. This also applies to out of stock parts.
*Seven Year Parts and Labour Warranty must be

registered within 31 days of installation either online at www.luxairhoods.com or by mail. Twelve months parts and labour warranty is standard without registration, but proof of purchase may be required. Your statutory rights are not affected.

Energy Efficient Extraction

Kitchen cooker hoods are appliances designed to be placed above a Hob/Cooker to filter the air in your kitchen. They can be either ducted out or recirculated with charcoal filters.

For many people a kitchen extractor is just an afterthought, but not having adequate ventilation can lead to permanent damage to your kitchen. Grease can stain your paint work and builds up in hard to clean places, as well as this odours linger in your home when sufficient ventilation is not installed.

Cooker hoods now come in many different forms all with their own style, installation and extraction rates.

Luxair offer a wide range of hoods now with our new 'A' rated more environmentally friendly motors and energy efficient LED lights. Better performance with reduced power consumption.

BRUSHLESS MOTORS

Guaranteed considerable energy saving, coupled with high extraction efficiency. They consume 85% less than conventional electric motors on lower speeds, and 35% less at high speeds.

Available on many of the hoods in our range, our brushless motor technology offers up to A+++ energy ratings and increased reliability.

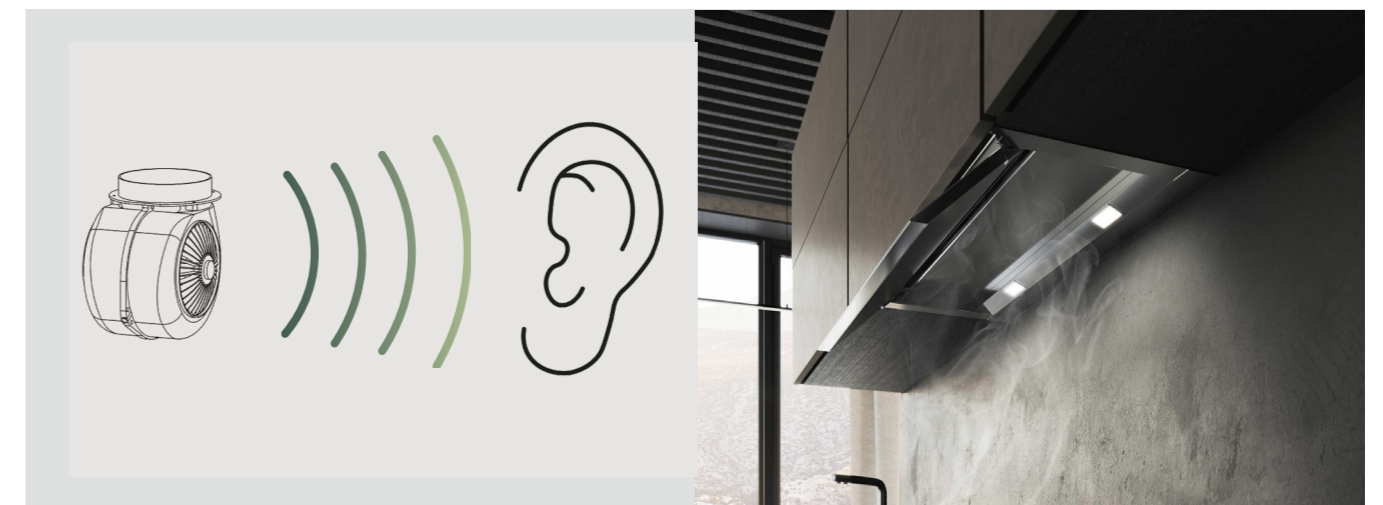

With over 20 years experience, our brand is now the envy of the industry and now one of the UK's best selling kitchen extractor range. We offer the largest range of cooker hoods and bathroom extractors with the best warranty available.

Luxair still back most of our products with a free 7 year parts and labour warranty!

Some products benefit from an additional 2 or 5 year free warranty.

All warranty repairs are carried out by our in house service engineers that operate throughout the UK.

Register warranties at www.luxairhoods.com/cooker-hood-warranty

ENERGY EFFICIENT - QUIET - LOW ACCENT SOUND

Reduce noise up to 3dB(A) and increase efficiency by 30% even in the presence of a long stretch of ducting, so even the most powerful extractors stay quieter on average across all power levels due to the tone the motors produce.

External Motor Options

External motors are designed to be installed with our ceiling extractors and can be ducted up to 6 metres away from the hood. These motors are IP45 rated and are water resistant.

All our external motors have a very high extraction rate of 1200m³/hr and are finished in 18/10 grade stainless steel. All our ceiling hoods are remote control operated and are incredibly easy to install.

Why Use External Motors?

- Reduce the noise from your cooker hood.
- Save space in your kitchen.
- Not enough space in the ceiling void for an internal motor.

The external motors shown in this section are designed to work with the Luxairs Anzi and Tolvi range of ceiling hoods.

FLAT ROOF EXTERNAL MOTORS

These motors are best suited to being installed on a flat roof.

A tower unit is provided to raise the motor from the roof so that the motor is not blowing directly on to your roof tiles.

WALL EXTERNAL MOTORS

These motors are ideal for situating on an external house wall.

They have a flat under body that fits flush against the wall.

PITCHED ROOF EXTERNAL MOTORS

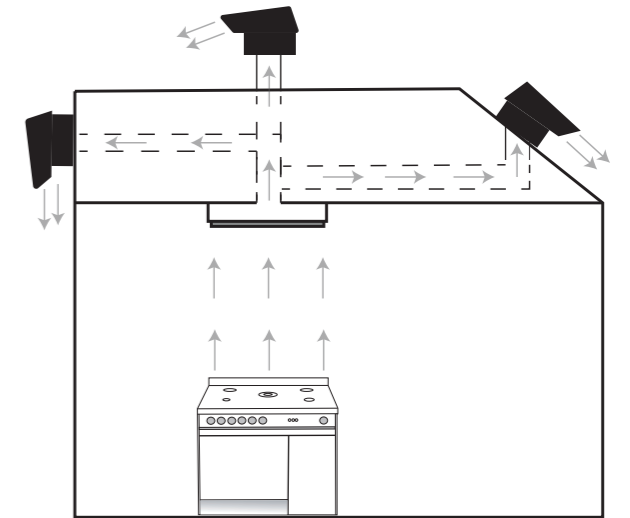

These motors are ideal for situating on an external house wall.

They have a flat under body that fits flush against the wall.

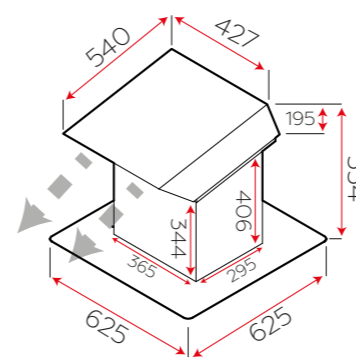

EXTERNAL

External motors can be ducted up to 6m away from the hood.

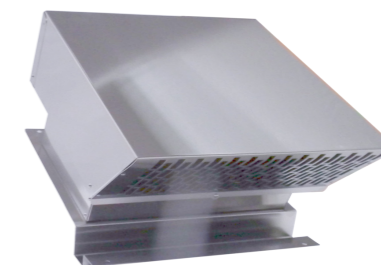

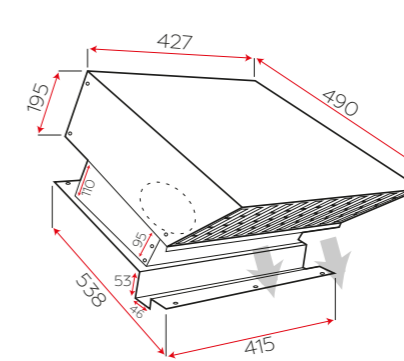

Luxairs 150mm round ducting pipe will fit directly on to the motor inlet and the hood outlet.

ACCESSORIES

Charcoal Filters / Metal Grease Filters

**CLICK
HERE**
To GO To Our
Webpage

Luxair's Metal Grease Filters and Charcoal Filters collect grease and fats before they enter the motor.

- ☞ If you are not ducting out you will require charcoal filters. These will collect fats, grease and odours before air recirculated back in to the room.
- ☞ When recirculating your extractor, you must replace the charcoal filters every 2-3 months or every 50 hours of cooking in order to maintain a clean motor as well as prolonging its life span.
- ☞ Metal grease filters can be placed in your dishwasher upright as you would a plate! This will remove the built up of grease and make them look like new again

Our ducting is available in 100mm, 125mm and 150mm sizes.

100mm circular ducting = 120mm x 60mm rectangular equivalent

125mm circular ducting = 150mm x 70mm rectangular equivalent

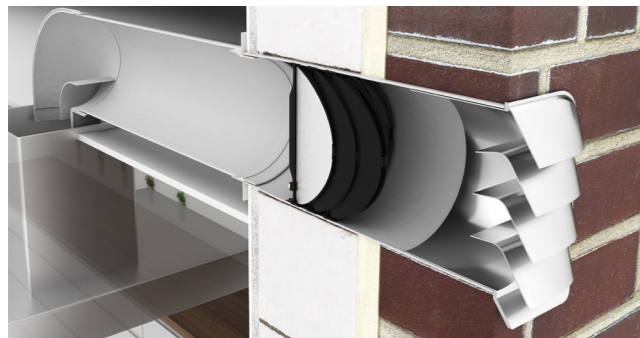

150mm circular ducting = 220mm x 90mm rectangular equivalent

All our ducting is now numbered so that products can be easily identified and you can order the parts you need.

Heat Retention Cartridge & Wall Vents

Our heat retention system closes the opening of the building when the system is not in use, thus it is the perfect solution for securely sealing your property in energy efficiency houses
