WHAT IS A BRUSHLESS MOTOR?

Brushless Motors - Reduces noise up to 3dB(A) and increase hood efficiency by 30% even in the presence of a long stretch of ducting, so even the most powerful cooker hoods stay quieter across all power levels.

The Brushless BLDC Motor - Guarantees considerable energy saving coupled with high extraction efficiency. They consume 85% less than conventional electric motors at low-medium speeds (in kW/h), and 35% less at high speeds. They are also the most silent-running motors on the market today and guarantee stable performance under all operating conditions. The motor also makes the extraction more precise in speed and are more durable than a traditional brush motor

WALL HOODS

Introduction

Wall Mounted Kitchen Cooker Hood Extractor Fans to compliment your hob and your kitchen layout, cooker hoods can even become a design feature in their own right. At Luxair there's a range of design options to suit both room layout and styles, suitable for both induction and gas hobs. How much of a feature these innovative products can be is completely up to you. Luxair have the most powerful 1350m³/hr motor featured in the LUSSO range and some of the quietest with our brushless motor options too!

LINEA

Sizes: 60cm - 150cm
Colours: Black, White, Stainless Steel

ARTIS

Sizes: 60cm & 90cm
Colours: Black, Stainless Steel

AREZZO

Sizes: 100cm - 150cm
Colours: Black, Stainless Steel

MODA

Sizes: 60cm - 120cm

Colours: Black, White, Stainless Steel

Key Features:

- Powerful Energy Saving 780m³/hr Brushless motor
- A+ Rated Energy Efficiency
- 2 x Dimmable 4w LED Strip Lights
- Dynamic LED Lights allowing you to alter colour temperature to a setting of your choice (2950° - 6500° Kelvin)
- 3 Speeds
- Timer Function
- Intensive Boost Mode
- Electronic LED Backlit Controls

Brushless Energy Efficient Motor - Reduces noise up to 3dB(A) and increase efficiency by 30% even in the presence of a long stretch of ducting, so even the most powerful extractors stay quieter on average across all power levels due to the tone the motors produce.

 CURVA

Sizes: 60cm & 90cm
Colours: Black

 ASCENTI

Sizes: 60cm & 90cm
Colours: Stainless Steel

HUBBLE

Sizes: 60cm
Colours: Black

LUSSO- FLAT

Sizes: 90cm - 120cm
Colours: Stainless Steel, Anthracite

LUSSO- STD

Sizes: 90cm & 120cm
Colours: Stainless Steel

Key Features:

- Our most powerful kitchen extractor with an Impressive **1350m³/hr**
- compatible with Remote control (optional extra)
- suitable for range cooking
- 5 minute Timer Function
- B rated energy efficiency
- Heavy Duty Baffle Grease filters fitted as standard
- A rated LED Lighting
- 18/10 Premium grade Stainless Steel
- LED display

GALAXY

Sizes: 60cm
Colours: Black

FLT

Sizes: 60cm - 110cm
Colours: Black, Stainless Steel

ISON

Sizes: 60cm & 90cm
Colours: Black

STD

Sizes: 60cm - 110cm

Colours: Black, Stainless Steel, White, Ivory

CVD

Sizes: 60cm - 110cm

Colours: Black, Stainless Steel, White, Ivory, Anthracite

DELTA

Sizes: 60cm

Colours: Black, Stainless Steel

MASTER-RANGE

Sizes: 60cm - 120cm

Colours: Black, Stainless Steel

Key Features:

- Powerful Energy Saving 850m³/hr Brushless motor
- A++ Rated Energy Efficiency
- Bright 4000° Kelvin 4w LED Lights
- Premium Textured Anti Scratch Black Paint
- Industrial Look Brushed Steel Corners
- Electronic Controls + Timer Function
- 3 Speeds + Powerful Boost Mode
- Premium Finish Washable Metal Grease Filters
- Adjustable Telescopic Chimney Section
- Available in sizes 60cm - 120cm, black or Stainless Steel
- Classic Range look

Brushless Energy Efficient Motor - Reduces noise up to 3dB(A) and increase efficiency by 30% even in the presence of a long stretch of ducting, so even the most powerful extractors stay quieter on average across all power levels due to the tone the motors produce.

BUILT-IN

Introduction

Canopy hoods are designed to be inserted flush into your choice of casing to create an extractor that will only really be seen when using the cooking space. Above, the canopy hood is fitted into a chimney breast for a classic farmhouse look, however, it could also easily be fitted into a piece of wall cabinetry as a clever disguise

52/74-CAN

Sizes: 60cm & 90cm

ISLAND

Introduction

Some island extractors are designed to be disguised even as a pendant light so that they integrate seamlessly into your kitchen design. Some can be hung to resemble a shelf to streamline with worktops and cupboards. Island extractors are more and more popular due to open plan kitchens and Luxair Cooker Hoods have one of the largest choices available

IP65 RATED

CEILING HOODS WITH EXTERNAL MOTORS

Introduction

Installing the motor externally means that it can be located where the noise will cause less disturbance. This reduces the noise at the hood to a minimum. For a significant reduction in noise levels, the motor should be situated at least 2m away. By installing an external motor and removing the noise from above the hob, the noise is then relocated to the outside of your house and in some cases you will hear silence in the kitchen. External motors can also be beneficial for installations where space in the ceiling is an issue.

DOWNDRAFT

Introduction

The extractor hob is the latest innovation in kitchen design. It combines two key appliances in one. An extractor hob draws odours and grease particles directly out of your saucepans. This helps keep any odours from rising up and spreading throughout your kitchen. You'll need to use some space beneath the hob to house the appliance's motor. An extractor hob is incredibly efficient. This is because it takes care of any odours at source. The extraction unit is positioned in the centre of the hob. It draws the steam and cooking odours directly from your saucepan by pulling the air down. Essentially, it's about design as you can keep the space above the hob completely clear. They are also ideal for open-plan kitchen spaces. Extracting grease and odours right at the source prevents them from straying into the room and lingering long after dinner and when placed on an island, they allow you to easily keep conversation with guests flowing if you're cooking, instead of leaving you facing the wall
