

HOOD INSTALLATION, MAINTENENCE AND USAGE

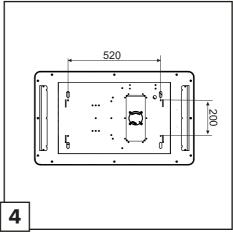

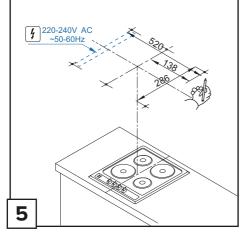

LA 90 ORION STRATOS BG LA 90 ORION STRATOS WG

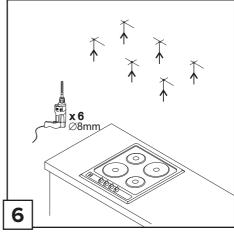

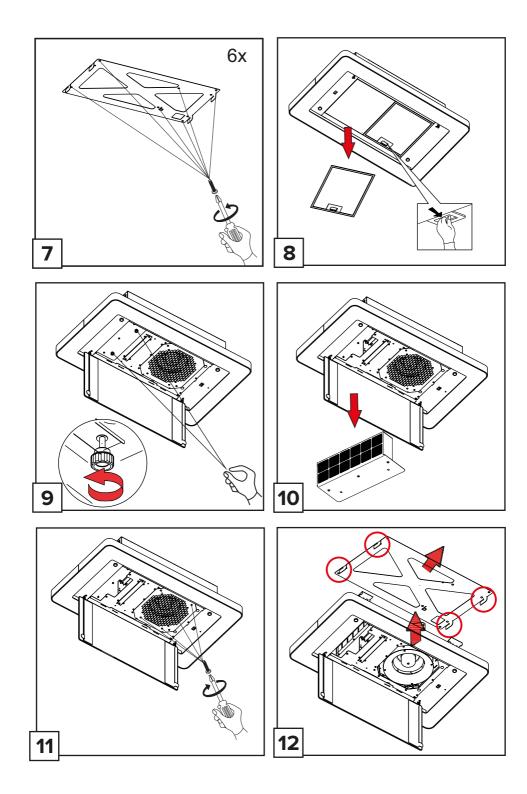

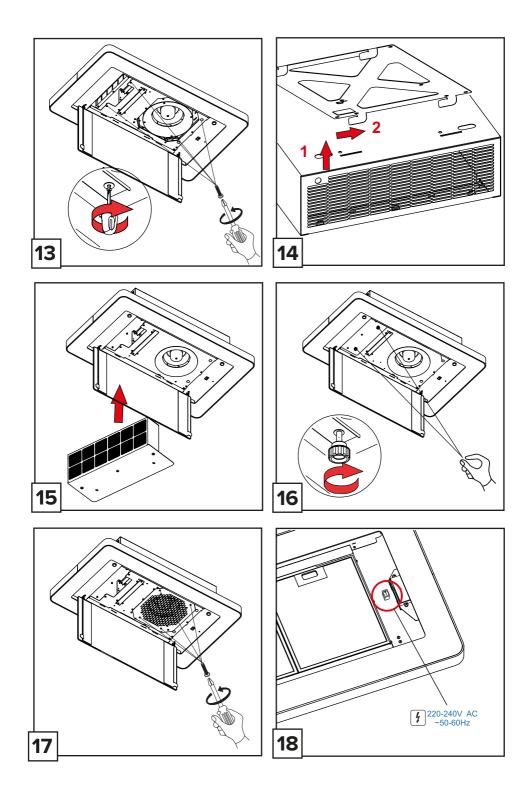

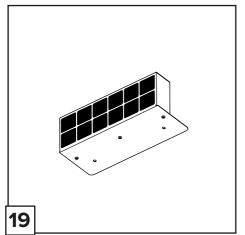

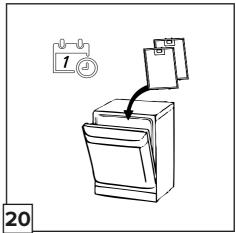

Closely follow the instructions set out in this manual. All responsibility, for any eventual inconveniences, damages or fires caused by not complying with the instructions in this manual, is declined. The extractor hood has been designed exclusively for domestic use.

The hood can look different to that illustrated in the drawings in this booklet. The instructions for use, maintenance and installation, however, remain the same.

- ! It is important to conserve this booklet for consultation at any moment. In the case of sale, cession or move, make sure it is together with the product.
- ! Read the instructions carefully: there is important information about installation, use and safety.
- ! Do not carry out electrical or mechanical variations on the product or on the discharge conduits.

Note: the elements marked with the symbol "(*)" are optional accessories supplied only with some models or elements to purchase, not supplied.

- ! Do not connect the appliance to the mains until the installation is fully complete.
- ! Before any cleaning or maintenance operation, disconnect hood from the mains by removing the plug or disconnecting the mains electrical supply.
- ! Always wear work gloves for all installation and maintenance operations. The appliance is not intended for use by children or persons with impaired physical, sensorial or mental faculties, or if lacking in experience or knowledge, unless they are under supervision or have been trained in the use of the appliance

- by a person responsible for their safety.
- ! This appliance is designed to be operated by adults, children should be monitored to ensure that they do not play with the appliance.
- ! This appliance is designed to be operated by adults. Children should not be allowed to tamper with the controls or play with the appliance.
- ! Never use the hood without effectively mounted grating!
- ! The hood must NEVER be used as a support surface unless specifically indicated.
- ! The premises where the appliance is installed must be sufficiently ventilated, when the kitchen hood is used together with other gas combustion devices or other fuels.
- ! The ducting system for this appliance must not be connected to any existing ventilation system which is being used for any other purpose such as discharging exhaust fumes from appliances burning gas or other fuels.
- ! The flaming of foods beneath the hood itself is severely prohibited. The use of exposed flames is detrimental to the filters and may cause a fire risk, and must therefore be avoided in all circumstances.
- ! Any frying must be done with care in order to make sure that the oil does not overheat and ignite.
- ! Accessible parts of the hood may became hot when used with cooking appliance.
- ! With regards to the technical and safety measures to be adopted for fume discharging it is important to closely follow the regulations provided by the local authorities.
- ! The hood must be regularly cleaned on both the inside and outside (AT LEAST ONCE A MONTH).
- ! This must be completed in accordance with the maintenance

instructions provided in this manual). Failure to follow the instructions provided in this user guide regarding the cleaning of the hood and filters will lead to the risk of fires.

- ! Do not use or leave the hood without the lamp correctly mounted due to the possible risk of electric shocks.
- ! We will not accept any responsibility for any faults, damage or fires caused to the appliance as a result of the non-observance of the instructions included in this manual.
- ! This appliance is marked according to the European directive
- ! 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

The symbol on the product, or on the documents accompanying the product, indicates that this appliance may not be treated as household waste. Instead it should be taken to the appropriate collection point for the recycling of electrical and electronic equipment. Disposal must be carried out in accordance with local environmental regulations for waste disposal.

For further detailed information regarding the process, collection and recycling of this product, please contact the appropriate department of your local authorities or the local department for household waste or the shop where you purchased this product.

Filter version

One active charcoal filter is needed for this and can be obtained from your usual retailer.

The filter removes the grease and smells from the extracted air before sending it back into the room through the upper outlet grid.

Installation

Check of the ceiling. The ceiling must be flat, horizontal, sturdy enough, and resistant A qualified technician must verify the suitability of the materials according to the type of wall/ceiling. The wall/ceiling must be strong enough to bear the weight of the canopy. Do not tile, grout or silicone this appliance on the wall. Surface installation only.

Warnings

The hood is designed to be installed in a dropped ceiling The dropped ceiling must be sturdy and have a load-bearing capacity suitable for a product with weight of 20,5 kg.

Do not install the hood directly in the dropped ceiling panels, but use a suitable frame or support.

The minimum distance between the supporting surface for the cooking equipment on the hob and the lowest part of the range hood must be not less than 50cm from electric cookers and 65cm from gas or mixed cookers.

If the instructions for installation for the gas hob specify a greater distance, this must be adhered to

Electrical connection

The mains power supply must correspond to the rating indicated on the plate situated inside the hood. If provided with a plug connect the hood to a socket in compliance with current regulations and positioned in an accessible area, after installation. If it not fitted with a plug (direct mains connection) or if the plug is not located in an accessible area, after installation, apply a double pole switch in accordance with standards which assures the complete disconnection of the mains under conditions relating to over-current category III, in accordance with installation instructions.

Warning! Before re-connecting the hood circuit to the mains supply and checking the efficient function, always check that the mains cable is correctly assembled.

The hood is provided with a special power cable; if the cable is damaged, request a new one from Technical Service.

Operation

Use the high suction speed in cases of concentrated kitchen vapours. It is recommended that the cooker hood suction is switched on for 5 minutes prior to cooking and to leave in operation during cooking and for another 15 minutes approximately after terminating cooking.

Key	Single push	Holding for more than 2 seconds	
+	Increase gearing	Light color adjustment	
-	Reducing gear	Engine shutdown	
<u>(</u>	Start timer	-	
☼	Light on/off	Dimmer	

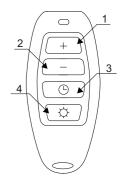

Dynamic light:

To adjust the light temperature (hot/cold), press and hold button + (1) on the remote control.

0 = the coldest colour

50 = neutral colour

100 = the warmest colour.

Timer:

Pressing the timer button on the remote control (3) starts the timer and runs for 10-15 minutes, signalled by the LED indicator light flashing. If the hood is switched off, the timer is also automatically deactivated.

Light dimming:

Holding down light button (4) for more than 2 seconds changes the light intensity.

New remote control (service reason):

Pressing If you need to connect a new remote control, pair it with the hood again. Please unplug the hood from the power outlet for about 10 seconds. Then reconnect the hood and hood again and press any button on the new remote control. The hood is now paired again

Eco Boost:

The hood has 4 speeds for suction power. At speed 4 (booster), the speed is automatically lowered to level 3 after a few minutes. Depending on the electronic system, the speed is reduced from level 4 to 3 after somewhere between 5 and 7 minutes.

Maintenance

ATTENTION! Before performing any maintenance operation, isolate the hood from the electrical supply by switching off at the connector and removing the connector fuse. Or if the appliance has been connected through a plug and socket, then the plug must be removed from the socket.

Cleaning

The cooker hood should be cleaned regularly (at least with the same frequency with which you carry out maintenance of the fat filters) internally and externally. Clean using the cloth dampened with neutral liquid detergent. Do not use abrasive products.

DO NOT USE ALCOHOL!

WARNING: Failure to carry out the basic cleaning recommendations of the cooker hood and replacement of the filters may cause fire risks.

Therefore, we recommend observing these instructions. The manufacturer declines all responsibility for any damage to the motor or any fire damage linked to inappropriate maintenance or failure to observe the above safety recommendations.

Grease filter

Traps cooking grease particles. This must be cleaned once a month using non aggressive detergents, either by hand or in the dishwasher, which must be set to a low temperature and a short cycle. When washed in a dishwasher, the grease filter may discolour slightly, but this does not affect its filtering capacity.

To remove the grease filter, pull the spring release handle.

Ceramic filter

The filter can be cleaned to prolong use of up to 2 - 3 years in normal usage of 2 to 3 hours per day. Simply place them in a pre-heated oven of 150°C - 180°C for 1 to 2 hours to regenerate them. When doing this please take care not to cover the surfaces where the air passes through.

IMPORTANT!! Always use the lighting of the same type as installed by the manufacturer. If you are not sure which part to use contact your nearest dealer.
