Orion Hood Remote Control Instructions Radio Frequency

The cooker hood can be programmed to automatically switch off the turbine in up to 9 minutes. The timer is activated by pressing the button while the hood is running on the desired speed.

Use the "+" and "-" buttons to set the desired operation time in increments of 1 min.

To confirm your choice and start the timer, either press the button or wait 5 seconds without pressing any buttons. The "Timer" function is deactivated by pressing the button again during the time countdown.

Programming/Pairing

The "-" button decreases turbine speed.
The "+" button increases turbine speed.
